## Peering Eye

The Shipping Publication: 9 January 2026

### Review of ship activity in key shipping hubs

Dear reader enjoy the weekly version of The Officials Peering Eye, where we cover activity on key shipping hubs around the world, expanding to Suez Canal, Panama Canal, Rotterdam, Al Zour refinery, Zirku, Novorossiysk, as well as the usual information and graphics about Indian ports. Following the “blockade”, we have also expanded the Peering Eye capabilities to include Puerto Jose (Puerto La Cruz), Punto Fijo and Maracaibo.

### Puerto Jose 9 January 2026

Located on the eastern Caribbean coast, the Puerto Jose terminal handles the vast majority of Venezuela's exported barrels and is equipped to load large tankers, including VLCCs via offshore moorings. In recent months, most of the country's roughly 900 kb/d of crude and product exports are believed to have been staged through Puerto Jose, particularly cargoes bound for China and those lifted by Chevron under its US licence.

Currently, there are 6 tankers within 50 nautical miles, 1 more compared to last week.

## Punto Fijo 9 January 2026

Punto Fijo is located on the Paraguana Peninsula in Falcon state on Venezuela's north-western Caribbean coast. The port is tied to the Paraguana Refining Complex, including the Amuay and Cardon refineries. While export volumes are limited and irregular, Punto Fijo occasionally handles shipments of crude and refined products when refinery operations and logistics allow. Its importance has declined sharply in recent years.

Currently, there are 15 tankers within 50 nautical miles, 7 less compared to last week 19, with 6 less crude tankers.

## Maracaibo 9 January 2026

Maracaibo remains a secondary but strategic crude export hub for Venezuela, serving production from the Lake Maracaibo basin via terminals such as Puerto Miranda. Volumes are well below historical peaks due to infrastructure limits and sanctions, with exports typically moving on smaller Aframax or Panamax vessels. While far less significant than Puerto José, Maracaibo continues to provide an important outlet for western Venezuelan crude under constrained export conditions.

There is currently just 1 vessel with active AIS within a 50 nautical mile radius. There were 4 just a week ago.

## Rotterdam 2 January 2026

# The Shipping Publication

## Novorossiysk 9 January 2026

The Novo port in Black Sea, which has been affected by repeated attacks from Ukraine and currently has only 1 out of the 3 SPMs in operation and the restart of the SPM3 has now been pushed to the middle of January. There are 24 vessels within 50 nautical miles of the port, 4 more compared to a week ago. The Crude tankers count rose by 5, while Products tankers count dropped by 2.

## Zirku 9 January 2026

Zirku is the port loading Upper Zakum – a field with production of over 1.1 mill b/d. Remember Upper Zakum continues to be the primary grade declared in the Dubai window whenever there are convergences folks! Since October, 83 out of 113 cargoes declared in the Dubai window have been Upper Zakum.

The port, as of this afternoon, had 14 vessels within 50 nautical miles, 6 less more compared to last week, as the crude tanker count fell by 3 and Oil/Chemical tanker was down by 2.

Map controls: zoom in, zoom out, pan, etc.

## Vadinar 9 January 2026

Vadinar Port normally serves Nayara and Reliance at Jamnagar in the Gujarat region in Northwest India with dedicated pipelines. It primarily exports gasoline and diesel, as well as other distillates such as kerosene. It handles VLCCs and can manage 50+ mil tons per year.

There are 47 ships in the vicinity of Vadinar, 2 more than last week. Crude tankers count fell by 4, while Products tankers rose by 3.

## Paradip 9 January 2026

Paradip Port is an artificial port located near the midpoint between Kolkata and Visakhapatnam. It handles primarily Suezmax vessels to handle crude, as well as other commodities such as iron ore and thermal coal. The port handled over 150 million tons of cargo in the financial year 2024–25 and is equipped with multiple Single-Point Mooring (SPM) systems that allow large crude carriers to discharge directly into onshore pipelines. Paradip primarily feeds the IOCL Paradip Refinery, a modern 15 million tons-per-year complex located just inland, which relies on the port for crude imports and product evacuation. The port is also developing infrastructure to supply Numaligarh Refinery (NRL) in Assam, which is constructing a crude-import terminal and long-distance pipeline linked to Paradip. With expanding liquid-bulk capacity and strategic refinery connections, Paradip remains the energy backbone of India's eastern seaboard.

There are 8 vessels within 50 nautical miles of Paradip, no change week on week.

## Mumbai 9 January 2026

Mumbai Port, situated on India's west coast, serves as a critical hub for crude oil and petroleum-product flows into the Mumbai metropolitan region and adjacent states. The port's oil terminal on Butcher Island (Jawahar Dweep) handles imports of both crude and refined products; the facility includes dedicated jetties and storage tanks for oil companies. Importantly, on the refining side, Bharat Petroleum Corporation Limited's Mumbai refinery (in Wadala, Mumbai) has a nameplate capacity of almost 7 million tonnes per annum. According to Mumbai Port Authority's revised estimates in 2024-25 FY the crude imports totalled 30.5 million metric tonnes, while it handles 11.8 million metric tonnes worth of petroleum products.

The Peering Eye shows 25 ships near Mumbai, 4 less than a week ago, but 3 more Crude tankers and 2 less Oil/Chemical tankers.

## Cochin Anch 9 January 2026

Cochin Port, operated by the Cochin Port Authority, has become one of India's most important oil-handling hubs. In the financial year 2024-25, total cargo throughput reached around 37.75 million tons, supported by strong liquid-bulk performance, which accounted for about 66% of all traffic ( $\approx$ 25.10 million tons). Crude-oil imports dominated the mix at roughly 17.26 million tonnes, while petroleum products contributed around 6.3 million tons, reflecting the port's expanding role in both upstream and downstream energy logistics. A significant portion of Cochin's crude intake feeds BPCL's Kochi Refinery – one of India's largest – via offshore single-point moorings and dedicated pipeline links. The refinery's large-scale operations (15.5 million ton per year capacity) anchor the region's fuel supply, with refined products transported onward through Cochin's road, rail and coastal-shipping connections to markets across southern India.

8 ships are within 50 nautical miles of Cochin Anch. Last week there were 13. There are 2 less Crude tankers and 2 less Product tankers.

## Visakhapatnam 9 January 2026

Visakhapatnam has quietly become one of India's busiest crude gateways. In May 2024 alone, the port handled 1.43 million tonnes of crude oil across just 13 tankers – an unusually heavy month that underlines how central the port has become to India's east-coast refining system. While, according to the Visakhapatnam Port Authority crude imports exceeded 12.5 mill tonnes in FY 2023-24. Most of this crude flows directly into HPCL's Visakhapatnam refinery, a major complex with refining capacity at 15 mill metric tonnes per year and plans to expand to 18 mill metric tonnes by the next 3-4 years. The port also moves significant volumes of refined products – gasoline, diesel and other distillates – moving into eastern and central India through coastal and inland distribution channels.

Visakhapatnam Port has 4 vessels within 50 nautical miles, 3 more compared to December 19.
